DUCKER RETRACTOR

- Manufactured in Germany by instrument makers with years of experience, utilizing the highest quality stainless steel and processes.
- Invented by Thomas Ducker, M.D.
- Designed to be used during posterior cervical procedures and micro lumbar discectomies.
- Features interdigitating blades that provide a very low profile for easy insertion.

Toothed hook is less traumatic than sharp pointed hooks which can tear tissue during insertion and removal

- The hook also provides for a more stable hold that reduces retractor body twisting.
- The Ducker Retractors are available in two lengths, both right and left.

Ducker Retractors

Cat#	Description
RB2325	DUCKER RETRACTOR SET (includes all four sizes)
RB2326	DUCKER RETRACTOR 50x20mm LEFT
RB2327	DUCKER RETRACTOR 50x20mm RIGHT
RB2328	DUCKER RETRACTOR 70x20mm LEFT
RB2329	DUCKER RETRACTOR 70x20mm RIGHT

Our Ducker Retractors should be properly treated. All instruments should be inspected prior to every use. All damaged instruments should be removed from service.
